

ClearDrops[®]

Heavy metals, environmental toxins, and pollutants are all around us. In the air we breathe. In the foods we eat. In the water we drink.

Most of the environmental toxins, including heavy metals, are **water-soluble which means that these toxins are absorbed into our bodies and are distributed to several compartments and organs in our bodies**. These heavy metals and toxins drive cellular dysfunction and are a contributing factor to why people do not feel well [1], [2], [3], [4].

Heavy metals and environmental toxins are very easy to overlook as a potential reason for people not performing at the level they desire.

Zeolite clinoptilolite (sodium aluminosilicate), a mineral formed over time after volcanic lava meets sea water, has the capability to **attract and retain heavy metals and several other toxins** [5], [6]. Over the past several years, multiple zeolite clinoptilolite **powders and water suspension formulations** have been made available to the American market. **The zeolite clinoptilolite crystal in all these formulations is not water-soluble; these formulations have very little to no bioavailability.**

Recently, the low bioavailability problem of the zeolite clinoptilolite was solved!

Dr. Nikolaos Tsirikos-Karapanos (triple Board Certified; Pharmacist, Medical Doctor, Cardiovascular Surgeon), President of Metron Nutraceuticals [7] created the only **water solution of water-soluble zeolite clinoptilolite**. The water solution of water-soluble zeolite technology created the **only patented, zeolite dietary supplements in the world**. **ClearDrops®** is one of very few **triple-patented** dietary supplements in the world [8], [9], [10].

ClearDrops® is a true binder of heavy metals and other environmental toxins. Taken daily by mouth, **ClearDrops®** can support the human body by offering systemic detoxification* daily*.

ClearDrops® is **produced in the USA** by Metron Nutraceuticals, a stellar **FDA Registered and FDA Inspected** Dietary Supplements R&D company located in Cleveland, Ohio. Metron Nutraceuticals' production and testing standards exceed the FDA/cGMP standards for dietary supplements and in some aspects of testing, the FDA/cGMP standards for pharmaceutical products.

The water-soluble zeolite in Metron's **ClearDrops®** is **the cleanest zeolite on earth**. Every batch of water-soluble zeolite produced is tested for the presence of **sixty-nine (69)** Elemental Impurities (i.e., free metals). Additionally, every batch of **ClearDrops®** produced is tested for the presence of **twenty-nine (29)** Elemental Impurities (i.e., free metals). Metron's extensive testing for Elemental Impurities exceeds by far the FDA/cGMP standards for both dietary supplements and pharmaceutical products. The FDA/cGMP standard of testing for Elemental Impurities in liquid formulations is **four (4)** metals for dietary supplements, and **twenty-four (24)** metals for pharmaceutical products.
